1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-6, drawn to a method for forming a decorative trim of cured material, classified in class 264, subclass 219.
- II. Claims 7-10, drawn to apparatus for forming a decorative trim, classified in class 249, subclass 117.

2. The inventions are distinct, each from the other because:

Inventions I and II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the apparatus structure as claimed can be used to practice another and materially different process such as one in which a material which is not subject to curing, but merely softens or melts upon heating and solidifies upon cooling, is shaped in the mold cavity having the claimed structure.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art requiring divergent fields of search for the respective inventions, restriction for examination purposes as indicated is proper.

4. A telephone call was made to Louis J. Bovasso on November 19, 2003 to request an oral election to the above restriction requirement, but did not result in an election being made.
